PROJECTS

Project : DELL(Order Broker and Frictionless)
Client : DELL
Technologies : Java, JEE, JSP, JDBC , Servlets and Oracle

Description :

Order Broker & Frictionless acts as an interface between the cart check out and different order management systems (OMS) and handles the customer orders to the appropriate OMS systems. OB&FL has been designed in such a way it makes smooth process of the online orders to the different OMS system making finally to appropriate manufacturing location. OB&FL also provides UI to the manual intervention for the order processors to work on the orders having issues making them to flow to OMS.

As the team we work towards seamless flow of the orders from the online system to the OMS without any manual intervention to ensure better order management thereby promoting the Dell business with most stable automated system.

Responsibilities:

As a team member, am responsible for:

- Understanding and analyzing the requirement and provide implementation accordingly.
- Coding and Testing JUnit test cases.
- Writing java, jdbc, servlets, jsp classes
- Implementing the new highlights in the product
- Involved Issues and Bug fixes raised by QA Team.
